

Joe / ~~Bob~~ Mel  
Session # D-29

{ I is working against  
internal layout/  
functions/positions

B/W patterns

Concrete floor or asphalt  
narrow walls.

Large bldg like A/C hangar

\* focus on target object itself - describe in detail

smooth snout like a nose comes to a  
point

ovals in a row going away on R.  
side

looks like metal - gray color  
Thick alloy

The "Bs" have something to do with  
nose - narrow  
hooded windows

\* what is principle function of object?  
very powerful

\*\* Mel - have him focus on object in its  
entirety

Drives like an auto but has no  
steering wheel

somekind of vehicle

\* where do personnel which operate  
which located?

boxes or compartments

like shielded compartments  
very thick high backed seats  
4 people for operations

front left - primary operator  
front right - back-up operator

different place for other two

see's all four but sees plates  
or boxes in between

\* focus on other - what do they do

1 has levers/handles

3 handles - looks thru  
rubber eye piece like  
a rubber bulb.

heavy arm R. shoulder w slots  
down side

sits near thing w/ bumps like egg  
canton. sits sideways in  
seat thing that folds down

5th person - like in charge.

These people (2) in charge of power  
output

\* what is power output?

like point of shiny pin blue/white

thick drilled hard block steel very  
hard metal grooves - I see  
grooves. Can't tell if inside or  
outside

side mounted tubes, small like  
hydraulic shocks on a car  
banded together - coming out  
at R. angles from the block  
thing.

everything looks padded.  
soft fibrous padding

very sm. packages 4x8" face -  
up to stack, 2 stacks.  
something looks like TV screen

guy with levers/buttons works thru.

\*\* Mel - have him explore the oscilloscope  
like thing associated w/ guy w/ levers

scope is a picture - color  
2 sets - hazy red lines intersecting on  
top of one another & a circle =  
on the

They move when he pushes buttons  
comp

mini-key board computer  
2 bars in front that he  
rests hands on so fingers  
to

Some kind of design function like  
lunar module this must  
what appears to be an  
aperture device that rotates to  
azimuth.

grey button = elevation on it  
abbreviation for elevation

large red near thumb interlock  
action button  
buttons are square

different way of sensing on the  
screen - IR one minute  
camera like the next -

pictures of tanks/heavy armor  
vehicle - some mock-ups.

targets = pitch and yaw control  
secondary back up power sys.

manual override sys for computer  
small black box = only a "on"  
light.

cassette systems load into  
shock absorbing padded.

access 3 targets at one time  
instantly go to big pad

(D)

(C)

UP IN FRONT

(A)

(B)

NOSE OR SNOUT

(1)

TARGET ACQUISITION  
CONTROL PANEL.
